Estimated Labour time: 25 minutes

Construction Method:

1. Create a 4-balloon cluster using all of the round latex balloons, inflated to different sizes. Wrap the cluster around the neck of the foil balloon weight.
2. Inflate the Animalz balloon with air and tie it into the latex cluster by wrapping the neck around and through the centre of the cluster. Adjust the position of the balloons so that the arrangement sits well on the table.
3. Inflate one of the Reflex Lime Green 260 balloons leaving around 12" uninflated. From the knot end, twist at 4", then make 2 x 4" loops, a 1.5" bubble, 2 x 3" loops, a 1.5" bubble, 2 x 2" loops, a 1" bubble, 2 x 1" loops and a final 1.5" bubble to create the "palm frond". Deflate any remaining balloon and tie off, then tie the frond into the design as shown in the picture.

4. Add the Faux foliage into the design as desired, securing with balloon bond.
5. Create a spiral from the remaining Reflex Lime Green 260 balloon by wrapping the uninflated balloon around a cylindrical object, stretching slightly, and then inflating fully. Release a little air before tying.
6. Tie one end of the spiral 260 into the centre of the design and twist 2 bubbles into the other end.
7. Inflate the Tiger SuperShape balloon with helium and attach it to the end of the 260 spiral by wrapping the neck around and through the two bubbles created in step 6.
