

Make your own

Sempertex sweet shop

A ready to print template for you to re-create your own Sempertex sweet shop jars, using self-adhesive CD labels and Amscan round angled containers SKU: 410017

What you need:

- Amscan round plastic clear angled containers with lids 410017
- The template has been designed for Avery self adhesive CD labels No.L6043 paper matte finish
<https://www.avery.co.uk/product/cd-labels-l6043-100>

Printing your labels:

1. Load printer with the labels (make sure that the stickers are the right way up for your printer to ensure the ink prints on the right side)
2. Set up this PDF for printing, make sure NOT to scale the document else the print will not line up with the die lines of the stickers.
3. Select the pages you want to print. The document has been divided into finishes so the colours you have are easy to find.
4. You are all set to print your labels!

make sure to use the handy tabs to help line your labels up when applying to the jars.

**Note this document has been produced in an RGB colour mode, to ensure your print colours match the balloons as close as possible make sure you do not change this.*
