

UNICORN BIRTHDAY

Created By Chris Horne, Amscan International Limited.

Simple but elegant, this “on trend” design is certain to make a huge statement!

Product Required:

- 1 x Anagram Rainbow Unicorn SuperShape (31299-01)
- 4 x 11” Happy Birthday Latex (9900704)
- 1 x Medium Primary Twirlz (8231001)
- Co-ordinating Balloon Ribbon
- 1 x Rainbow Paper Fluffy Decoration (18056-90-55)
- 1 x 15cm white ceramic tile

Construction Method:

1. Tie a length of balloon ribbon around the tile in a cross pattern, to create an attachment point in the centre of the glazed side. Leave 2 x 45cm tails.
2. Remove the ribbon from the fluffy decoration, unfold it, and divide it into 2 halves (4 sheets of tissue). Refold the two halves, and set one aside to use in another design.
3. Tie the “half fluffy” to the tile around its midpoint, using the tails of balloon ribbon.
4. Inflate the Unicorn SuperShape balloon with helium, attach it to a ribbon, and then to the centre of the tile/fluffy base.
5. Inflate the 4 latex balloons with helium to 9”, using Hi-Float if desired.
6. Tie the latex balloons into a cluster of 4, and wrap around the base of the Unicorn Foil balloon.
7. Add the Twirlz tail to the centre of the latex cluster.
8. Fluff up the fluffy at the base, separating the layers fully for the best effect.

Estimated Labour time: 10 minutes.
