 1x Table Balloon Arch Kit BOR-B409
 - 1 clamp only
 1x 4' length of 1/4 aluminium rod
 1x pole from lamp stand (or equivalent)

Estimated Labour time: 30 minutes.

Construction Method:

1. Start by attaching the clamp in place on the table and place the section of lamp stand over the clamp. Insert the aluminium rod and bend into required shape. A question mark is a good shape to aim for.
2. Inflate the first balloon to go around the base to roughly 7" and create a cluster of 4 with the other 3 balloons inflated smaller than the first one. Lock this cluster onto the pole.
3. With every following cluster, drop the size of the largest balloon by half an inch every 2 layers.
4. Once you reach the end of the aluminium rod, inflate a small garland of 5" balloons tied onto a 260 and when you have your desired length, attach into the arch by wrapping the 260 into the design.
5. To complete the design you can add in some little organic elements consisting of single 5" balloons inflated fully and then reduced so it is very soft. Small bubbles can then be twisted into the balloon. Attach 2 of the organic elements at each end of a 260 and then attach into the arch.

Alternatively, this can be built using the base of a lamp stand so it can be moved around easily.
