Estimated Labour time: 35 minutes.

### Construction Method:

1. Double-stuff all the Graffiti Marble balloons with the 12" Reflex silver.
2. Inflate 1 x stuffed balloon to 7" and the other 6 to 6", squeezing them until they are round, and the colour is even. Inflate all the silver grey and black 5" balloons individually to varied sizes between 2" and 3".
3. Glue the smaller stuffed balloons around the bigger one to form a rough circle shape, then glue the little 5" balloons in between to create the "moon" surface.
4. Inflate the Astronaut foil balloon with helium, attach the small weight to his foot with stretchy tape and drop the weight between the balloons as shown in the picture.
5. Inflate the rocket ship balloon with air and attach it to the moon base with glue dots or Balloon Bond as shown.
6. Inflate the Alien Spaceship, the standard balloon and the Marblez Orbz with helium, and tie to monofilament line.
7. Assemble the balloons into a bouquet and tie the lines together. Attach the bouquet to the Astronaut's hand with a small piece of stretchy balloon tape.
8. Inflate the Reflex Violet 260 balloon with air, wrap it around the Marblez Orbz and tie off, removing any excess balloon, to create a "planet".
