

## CANDLE ARRANGEMENT

Created By Chris Horne, Amscan International Limited.

Around 8 feet tall and, because it's air-filled, VERY long lasting, this festive design is perfect for hotels, shopping malls, window displays and much more...

### Product Required:

- 4 x Anagram Full Decorator Panels, Red (2732099)
- 1 x Anagram Half Decorator Panel, Red (2732699)
- 3 x 19" Anagram Decorator Curves, Gold (1613999)
- 6 x Standard Anagram Foil Stars, Green (3055702)
- 6 x 5" Anagram Decorator Latex Balloons, Poppy Red (990077)
- 1 x Gold Metallic Table Cover (57999-19)
- 1 x 6ft Pole and base plate
- Balloon Bond (CC10630)
- Small cable ties

### Construction Method:

1. Inflate all the panel balloons with air. Roll them into cylinders and secure top and bottom corners together with cable ties.
2. Join two full cylinders together to form the tallest candle by overlapping the small "peaks" and securing with cable ties.
3. Repeat step 2 with a full and half cylinder to form the medium candle. The shortest candle is a full cylinder on its own.
4. Stick the three candles together using balloon bond, and drop them over the Base and pole to keep them upright.
5. Create the Holly Leaves by putting a custom seal lengthwise down each balloon using a bar sealer or craft iron. Be sure to avoid sealing the valves, then inflate carefully. Secure into bunches of 3 with cable ties. Make 2 x clusters of 3 x 5" red latex balloons for the berries and twist them into the leaves. Attach the leaves to the candles with balloon bond.
6. Inflate the 19" curves with air and secure to the tops of the candles with balloon bond to form the flames.
7. Cut a strip from the table cover and make 2 small bows - attach these to the tall and medium candles with balloon bond to disguise the joins.
8. Make a large bow with the remainder of the table cover and stick this to the base of the design with balloon bond.

**Estimated Labour time: 1 hour.**
