Estimated Labour time: 15 minutes.

Construction Method:

1. Inflate all 5" balloons with air to around 4" and tie into duplets
2. Inflate all 12" with air to around 8" and tie into duplets
3. Tie a scrap piece of balloon to the top of the pole to help keep everything in place at the end
4. Start with 2 duplets of black and lock into place on the pole
5. Make a quad with 2 duplets of 5" neon and 2 duplets of 12" neon, and then lock into place on the pole
6. Repeat steps 3 and 4 until all balloons are on the pole
7. Helium fill the foil supershape and tie a 260 around the nozzle. Using the 260, wrap it around the top cluster on the pole tightly, to fix the foil in place.
8. Finish the piece with 260 flowers, curly 260's and a chain of micro bubbles under the head of the foil supershape.
